

FSEC FEE SCHEDULE

(May 2009)

SOLAR THERMAL COLLECTOR AND SYSTEM TESTING, CERTIFICATION AND RATING

COLLECTOR TEST FEES

<u>Collector Test Type</u>	<u>Charges (\$)</u>
Full quality and performance testing*	\$9,000
Thermal performance testing only (ISO 9806-1 or ISO 9806-3) †	\$7,500
Quality testing only (ISO 9806-2) ‡	\$2,000

* Complies with all Florida and SRCC standards needed for certification.

† Does not include Florida qualification.

‡ Required for interim SRCC certification or interim FSEC rating

SYSTEM TEST FEES

<u>System Test Type</u>	<u>Charges (\$)</u>
Warm-up and heat loss tests*	\$9,000
ISO qualification tests (not required by Florida Standards):	
Warm-up and heat loss tests	add \$1,500
Component tests:	
Heat exchanger effectiveness test	\$2,500

* Complies with all Florida and SRCC Standards but not with ISO qualification standards.

The fee for performance tests required for specific system components will be established consistent with fees listed in the fee schedule. Variations in testing services may be arranged and a fee negotiated consistent with the fees for the scheduled services.

For FSEC to conduct other tests, evaluations or administrative actions in a combination not covered by the fee schedule, a fee will be established consistent with the fees listed above.

Termination of Tests Prior to Certification

1. If a collector or system fails to meet the requirements of FSEC Standard 102-05 after either the receiving inspection or the static pressure test has been performed, all except \$500 of the testing fee will be refunded.
2. If, during the 30-day exposure testing, the test must be terminated because of a collector failure as defined in FSEC Standard 102-05, the testing fee shall be adjusted to a maximum of \$2,000, depending on the point at which the exposure testing is halted.

COLLECTOR CERTIFICATION FEES

<u>Collector Certifications</u>	<u>Charges (\$)</u>
Original solar collector certification	\$400
Interim Collector Rating	\$200 additional
Re-certification for change in size and materials	\$250
Certification of Licensee	\$150
Reapplication fee*	\$200
Annual fee to maintain FSEC collector certification	\$150 per Supplier + \$30 per collector

For FSEC to conduct other administrative actions in a combination not covered by the fee schedule, the fee will be established consistent with the fees listed above.

* This fee will be charged when applications must be resubmitted due to inadequate information for FSEC to proceed with the certification process.

SYSTEM CERTIFICATION FEES

<u>System Certifications</u>	<u>Charges (\$)</u>
Original solar system certification	\$800
Certification of “similar system”	\$300
Certification of system already certified by another supplier	\$200
Revision of approved system (new rating not required)	\$200
Revision of approved system (new rating required)	\$400
Reapplication fee*	\$200
Annual fee to maintain FSEC system certification	\$150 per Supplier + \$30 per system

For FSEC to conduct other administrative actions in a combination not covered by the fee schedule, the fee will be established consistent with the fees listed above.

* This fee will be charged when applications must be resubmitted due to inadequate information for FSEC to proceed with the certification process.
